PROFESSIONAL SUMMARY

Data Analyst and Oracle PL/SQL Developer with 3+ years of experience in a high-volume retail enterprise. Specialises in end-to-end data pipelines — Oracle SQL query engineering, PL/SQL automation, ETL/data warehouse design, and Power BI dashboards. Delivers daily business intelligence for Sales, Inventory, Finance, and HR functions used directly by executive management.

EXPERIENCE

Oracle Developer / Data Analyst | Regency Group — Grand Hypermarket — Kuwait

Jun 2023 – Present

SQL Reporting & Analytics

- Engineered 50+ Oracle SQL (10g) reports on Toad — product-wise, brand-wise, category-wise, and location-wise breakdowns — cutting ad-hoc report delivery from days to under 1 hour across 5+ departments (Sales, Purchase, Inventory, Finance, HR).
- Built a daily Sales , YTD comparison report with GP% and net profit in Python, replacing a 3-hour manual process with a sub-5-minute automated run delivered to senior management every morning.
- Developed instant campaign-planning reports (discount eligibility, margin impact) enabling same-day decisions for marketing and planning teams.

Power BI Dashboards

- Designed and maintains a full Power BI dashboard suite (Sales, Stock, Fast-lines, Customer, HR) adopted as the primary reporting tool by management, replacing manual Excel consolidation.
- Pre-aggregated Oracle views and indexed tables to reduce Power BI dashboard refresh time by ~60% versus raw query loads.

PL/SQL Development & Data Engineering

- Architected a data warehouse in Oracle PL/SQL (Star Schema) with full ETL procedures, indexed views, and temp tables — serving as the single source of truth for all BI and executive reporting.
- Built an automated Purchase Order PL/SQL procedure triggered by stock-level rules, reducing manual PO creation effort by ~80% across multiple hypermarket branches.
- Created and maintains stored procedures, views, and temp tables for the internal operations portal — supporting Sales, Inventory, Finance, and Customer Loyalty modules.
- Designed Oracle DB schema (tables, constraints, indexes) for the retail operations web portal, ensuring data integrity across concurrent multi-location transactions.

TECHNICAL SKILLS

Databases: Oracle SQL (10g), Oracle PL/SQL, MS SQL Server

BI & Reporting: Power BI, Python (Pandas), Excel.

Data Engineering: ETL, Star Schema DWH, Stored Procedures, Views, Indexing

Languages: SQL, PL/SQL, Python, C#, JavaScript

Frameworks: ASP.NET Core, REST API, Python Flask

Dev Tools: Visual Studio, VS Code, Git

Other: ERP Integration, POS Systems, API Data Pipelines, Power BI Service

EDUCATION

B.C.A — Computer Applications (In Progress)

KL University, India | Expected: Feb 2027

Diploma — Computer Engineering | CGPA: 8.6

SSM Polytechnic College, Kerala, India |

Graduated: Feb 2023
